**5. Experience and General Information: (continued on page 2)**

1. Describe your major areas of work experience/expertise:

I have served both as a general contractor and as a manager representing public and private clients in oversight roles. My work experience includes industrial, transportation, environmental, and water/wastewater projects throughout the world, equally split between direct construction and owner oversight of construction. Having been involved in direct field operations, supervision, project development and executive oversight of construction projects ranging from \$30 million to \$1.5 billion, I have a thorough understanding of the issues associated with bidding and delivering a construction project. As an agency construction manager or program manager and having provided executive oversight of small to multi-billion dollar projects and programs for owners, I have a working understanding of the issues that owners face when getting their projects from planning to operations.

2. Describe your experience with construction claims:

- Provided training for public agencies and private companies on risk management and claims resolution
- Prepared and presented construction claims to dispute resolution boards as a contractor
- Analyzed and responded to claims submissions from contractors as an owner's representative

3. Describe your knowledge of construction contract law:

- Primary party for assignments to prepare standard and specialized construction contracts for municipalities, and local, state and federal agencies
- Trained in contract review by major U.S. and international corporations and was the responsible party for reviewing, approving and administering construction contracts

4. Describe your experience with construction contract administration:

Roughly half of my career has been providing construction and project management support for public agencies to oversight infrastructure projects:

- as a cost and schedule manager for CM oversight of public works projects
- as a Construction Manager for CM oversight of public works projects
- as a Project/Program Manager supporting public agencies on large infrastructure programs
- I am thoroughly knowledgeable of alternative project delivery processes and management of associated disputes and of the issues associated with administration of these types of projects

5. Describe your construction field experience:

Roughly half of my career has been in direct construction:

- as a surveyor and laborer building roads.
- as Field Engineer and Project Controls Engineer for the construction of earthfill dams and nuclear power plants
- as the Contracts Manager on large private EPC industrial facilities
- as the Construction Manager on design-build public works projects
- as the senior executive for design-build and PPP very large public works projects

6. Describe your DRB (or arbitration) training, certification, and experience:

Training/Certification:

- Dispute Resolution Board Foundation DRB training for Nevada DOT in 2016 and 2017 and for Caltrans in 2017

Experience:

- Member of Dispute (claims) Boards for public agencies and municipalities in California and Florida
- Member of Dispute (claims) Boards for a large industrial project in Hong Kong
- Prepared and presented issues to formal Dispute Resolution Boards for large transit projects where I was the Design-Builder
- Prepared rebuttal and claims defenses for public clients for projects where I was the client representative

7. Describe your employment/retirement status and availability to serve on a DRB and geographical area:

I work as a consultant for public and private clients in the construction industry and can arrange my schedule as needed to meet the needs of a particular project.

I am able to work throughout Colorado and the western U.S.

DRB members are compensated as per Section 105 of the CDOT Specifications.
